(54) Abstract Title

Use of ozone for treating diseases of body cavity tissues and apparatus therefor

(57) The invention relates to use of ozone in the manufacture of a gaseous medicament for treating a disease of a body cavity tissue in mammals by introducing the medicament into the cavity, and to an apparatus incorporating an ozone generator and means for supplying ozonized gas therefrom at a pressure sufficient to drive a flow of such gas through delivery means and into the body cavity. Diseases which may be treated in this manner are e.g. mastitis in cows and cystitis.
